HIGH EDUCATIONAL QUALITY

Why choose us

UNADE holds the **Institutional Accreditation for High Educational Quality**, a distinction that endorses and validates our **academic excellence** and the fulfillment of rigorous educational standards.

This seal is the result of a **sustained commitment to improvement**, program updates and the student experience. This recognition facilitates the transfer of credits between accredited institutions and the **international recognition of degrees**.

100% online methodology supported by an interactive platform available 24/7

Exceptional scheduling flexibility. Study anywhere, anytime

Over 300 professors and 60 PhD holders offering close, personalized guidance

Opportunity to attend International Seminars in Cancun, Madrid and Murcia-Granada.

PROGRAM

Benefits of the Doctorate in Computer Science

Personalized academic supervision with continuous individualized guidance and quality assessment processes.

Official RVOE recognition under Agreement No. 201838DI granted by the Secretariat of Education of Quintana Roo (SEQ).

Fully online delivery through an exclusive and interactive digital platform.

Opportunity to attend International Seminars in Cancun, Madrid and Murcia-Granada.

Exceptional scheduling flexibility Students take ownership of their learning process and organize studies to their individual needs.

Faculty of internationally recognized distinction with extensive professional and academic experience.

Introductory Course in Research and Competency Development featuring practical case studies and applied simulations.

PROGRAM GOALS

Objectives of the Doctorate

- Formulate and carry out original research projects in Computer Science
- Use and master tools and methodologies for research in computer science
- Contribute to the advancement of knowledge in Computer Science through scientific publications and participation in international conferences
- Develop a solid command of theoretical foundations and cutting-edge technologies
- Critically evaluate scientific results and research outputs

ADMISSIONS

Admissions Profile

Admission requirements to begin this program at UNADE:

Applicants interested in specializing in the field of computer science to contribute to scientific research.

Professionals who wish to pursue a teaching career in the area of computer science.

Applicants motivated to conduct research in technology, robotics, computer science, and related fields, with the aim of contributing to the improvement of society.

FINANCING

Scholarships & Financing

UNADE offers a University Scholarship Program designed to support students pursuing Master's and Doctoral degrees, promoting equal opportunity and facilitating access to higher education.

Scholarships are partial awards and cover a significant portion of tuition costs, applicable to master's, doctoral, and bachelor's programs.

Students may also be eligible for **interest-free monthly payment plans** offered by UNADE.

ACADEMIC PROGRAM

Program of Study

S1

First Semester

- Advising Phase I
- Scientific Research Methodology

S2

Second Semester

- Advising Phase II
- Introduction to Research Methods

S3

Third Semester

- Software Engineering and Technology
- Industrial Informatics and Electronic Technology
- Elective I
- Elective II

S4

Fourth Semester

- Research Phase I
- Findings and Actions of the Research

S5

Fifth Semester

- Research Phase II
- Doctoral Dissertation Initiation Phase

S6

Sixth Semester

- Doctoral Dissertation Development
- Doctoral Dissertation Project

METHODOLOGY

Learning Methods

UNADE employs the latest learning methodologies, supported by an interactive platform available 24 hours a day. Students are continuously accompanied by a program advisor and an academic advisor throughout the entire process.

Interactive Platform

Active student participation, peer interaction and a dynamic learning experience

Scheduling Flexibility

Manage your time and adapt to your individual needs to achieve your academic goals

Personal Advisor

Continuous support from an academic advisor throughout the entire program

Expert Faculty

The most innovative teaching methods delivered by top-level professionals

PROGRAM INTRODUCTION

Our Introductory Course

An academic program designed to prepare students for advanced graduate-level studies. It provides theoretical and practical foundations prior to initiating research in a specific field.

Leadership within organizations

Executive-level skills

Social responsibility

Information handling

Alternative methods

Dissertation defense

Upon completion, students are awarded an **800-hour Diploma** certifying the training completed.

INTERNATIONAL EXPERIENCE

International Seminars

UNADE offers students the opportunity to participate in international seminars focused on leadership, research skills, and attendance at distinguished academic events.

Madrid

International Seminar on Strategic Leadership & Executive Management
